SEMINAR 研討會			
09:30 - 10:10	Why Do We Randomize? 	Lecture Theater F 演講廳 F	How do we know whether a new vaccine is effective? How do we know whether a new government program has the intended impact? Researchers often try to answer these questions using “randomized controlled trials.” But what does it mean to “randomize” and why does it help us answer these types of questions? In this session, we will discuss the basic logic of randomization, and why this helps us find out about cause and effect. Using examples from across the social sciences, we will illustrate how the use of randomization has led to a better understanding about human behavior and institutions. <div>Speaker 講員</div> Prof. David Hendry, Program Director
